<b>1</b>	<b>Introduction</b>	<b>2</b>
1.1	Theory of General Relativity . . . . .	3
1.2	Cosmology . . . . .	4
1.3	Cosmological Models . . . . .	4
1.4	Cosmological Principles . . . . .	6
1.5	Cosmological constant . . . . .	6
1.6	Hubble's Law . . . . .	7
1.7	Energy-momentum tensors . . . . .	9
1.8	Dark energy and Dark matter . . . . .	10
1.9	Robertson-Walker Metric . . . . .	11
1.10	Brans-Dicke Theory of Gravitation . . . . .	15
1.11	Mathematical formulation of Brans-Dicke theory . . . . .	17
1.12	Work related with Brans-Dicke Theory of gravitation . . . . .	19
<b>2</b>	<b>Interaction of Gravitational field and Brans-Dicke field in R/W universe containing Dark Energy like fluid</b>	<b>23</b>
2.1	Introduction . . . . .	23
2.2	Solutions of Field Equations . . . . .	24
2.2.1	Case I: When $\omega = 0$ . . . . .	28
2.2.2	Case II: When $\omega = 0$ and $\Lambda = 0$ . . . . .	33
2.2.3	Case III: When $\omega \neq 0$ and $\Lambda = 0$ . . . . .	39

2.2.4	Case IV: When $\omega \neq 0$ and $\Lambda \neq 0$ . . . . .	41
2.3	Conclusion . . . . .	42
<b>3</b>	<b>Isotropic Robertson-Walker model universe with dynamical cosmological parameter <math>\Lambda</math> in Brans-Dicke Theory of Gravitation</b>	<b>44</b>
3.1	Introduction . . . . .	44
3.2	Metric and Solutions of field equations . . . . .	45
3.2.1	Case I: $k = 0$ and $0 < \beta < 3$ . . . . .	48
3.2.2	Case II: $k = -1$ and $\beta = 3$ . . . . .	49
3.2.3	Case III: $k = 1$ and $\beta = 3$ . . . . .	51
3.3	Conclusion . . . . .	53
<b>4</b>	<b>Robertson-Walker model universe with special form of deceleration parameter in Brans-Dicke Theory of Gravitation</b>	<b>55</b>
4.1	Introduction . . . . .	55
4.2	Metric and Field equations . . . . .	56
4.3	Solutions of field equations . . . . .	58
4.4	Models with Special form of Deceleration Parameter . . . . .	59
4.4.1	Case I: Flat model $k = 0$ , $\Lambda = \frac{1}{4} \frac{\ddot{R}}{R}$ . . . . .	61
4.4.2	Case II: Open model $k = -1$ and $\Lambda = \frac{1}{4} \frac{\ddot{R}}{R}$ . . . . .	61
4.5	Conclusion . . . . .	62
<b>5</b>	<b>Some spherically symmetric R/W universe interacting with vacuum B-D scalar field</b>	<b>64</b>
5.1	Introduction . . . . .	64
5.2	Solutions of Field Equations . . . . .	65
5.3	Conclusion . . . . .	74
<b>6</b>	<b>Viscous Robertson-Walker model with Barotropic equation of state in Brans-Dicke Theory of Gravitation interacting with Electromagnetic field</b>	<b>75</b>

6.1	Introduction . . . . .	75
6.2	Metric and Field equations . . . . .	76
6.3	Solutions of field equations . . . . .	78
6.3.1	Case A: Flat model $k = 0, \Lambda = a\left(\frac{\dot{R}}{R}\right)^2 + b\frac{\ddot{R}}{R}$ . . . . .	81
6.3.2	Case B: Open model $k = -1$ and $\Lambda = a\left(\frac{\dot{R}}{R}\right)^2 + b\frac{\ddot{R}}{R}$ . . . . .	83
6.4	Some physical models . . . . .	84
6.4.1	Case I: False vacuum model $\gamma = 0$ . . . . .	85
6.4.2	Case II: Stiff fluid model $\gamma = 2$ . . . . .	85
6.4.3	Case III: Radiation model $\gamma = \frac{4}{3}$ . . . . .	85
6.5	Conclusion . . . . .	86
<b>7</b>	<b>Interaction of electromagnetic field and Brans-Dicke field in Robertson-Walker cosmological model with time-dependent deceleration parameter</b>	<b>87</b>
7.1	Introduction . . . . .	87
7.2	Metric and Field equations . . . . .	88
7.3	Solutions of field equations . . . . .	90
7.4	Flat model $k = 0$ and $\Lambda = 0$ . . . . .	90
7.5	Model with Time-dependent Deceleration Parameter . . . . .	91
7.6	Some Physical Properties of the model . . . . .	92
7.7	Conclusion . . . . .	94
<b>8</b>	<b>Viscous Robertson-Walker model with Polytropic equation of state and charge in Brans-Dicke Theory of Gravitation</b>	<b>95</b>
8.1	Introduction . . . . .	95
8.2	Metric and Field equations . . . . .	96
8.3	Solutions of field equations . . . . .	98
8.3.1	Case I: Flat model $k = 0, \Lambda = a\left(\frac{\dot{R}}{R}\right)^2 + b\frac{\ddot{R}}{R}$ . . . . .	101
8.3.2	Case II: Open model $k = -1$ and $\Lambda = a\left(\frac{\dot{R}}{R}\right)^2 + b\frac{\ddot{R}}{R}$ . . . . .	102
8.4	Conclusion . . . . .	103

<b>9 Robertson-Walker model universe interacting with Electromagnetic field and Brans-Dicke field in the presence of Hybrid scale factor</b>	<b>105</b>
9.1 Introduction . . . . .	105
9.2 Metric and Field equations . . . . .	106
9.3 Solutions of field equations . . . . .	108
9.3.1 Case I: Flat model $k = 0, \Lambda = 0$ . . . . .	109
9.3.2 Case II: Open model $k = -1$ and $\Lambda = 0$ . . . . .	110
9.3.3 For both Flat and Open models . . . . .	110
9.4 Conclusion . . . . .	113

# List of Figures

2.1	Graph of $R$ vs. $t$ according to (2.41) . . . . .	30
2.2	Graph of $\Theta$ vs. $t$ according to (2.67) . . . . .	35
2.3	Graph of $R$ vs. $t$ according to (2.68) . . . . .	36
3.1	Graph of $\Lambda$ vs. $t$ according to (3.31) . . . . .	49
3.2	Graph of $q$ vs. $t$ according to (3.40) . . . . .	51
3.3	Graph of $\Lambda$ vs. $t$ according to (3.55) . . . . .	53
4.1	Variation of $q$ for different values of $t$ according to (4.20) . . . . .	59
4.2	Graph of $\phi$ vs. $t$ according to (4.22) . . . . .	60
4.3	Graph of $\Lambda$ vs. $t$ according to (4.37) . . . . .	63
5.1	Variation of $\omega$ for different values of $v$ according to (5.51) . . . . .	73
6.1	Graph of $R$ vs. $t$ according to (6.20) . . . . .	79
6.2	Graph of $G$ vs. $t$ according to (6.23) . . . . .	80
6.3	Graph of $V$ vs. $t$ according to (6.24) . . . . .	81
6.4	Graph of $z$ vs. $t$ according to (6.30) . . . . .	82
7.1	Graph of $q$ vs. $t$ according to (7.19) . . . . .	91
7.2	Graph of $R$ vs. $t$ according to (7.20) . . . . .	92
8.1	Graph of $R$ vs. $t$ according to (8.20) . . . . .	99
8.2	Graph of $q$ vs. $t$ according to (8.21) . . . . .	99
8.3	Graph of $\phi$ vs. $t$ according to (8.22) . . . . .	100

8.4	Graph of $\Theta$ vs. $t$ according to (8.26)	101
8.5	Graph of $\Lambda$ vs. $t$ according to (8.43)	104
9.1	Graph of $R$ vs. $t$ according to (9.19)	109
9.2	Graph of $\Theta$ vs. $t$ according to (9.28)	111
9.3	Graph of $q$ vs. $t$ according to (9.30)	112
9.4	Graph of $z$ vs. $t$ according to (9.35)	112
