

## *Acknowledgements*

While working on my Ph.D., I was lucky enough to receive support and encouragement from many people. I am indebted to all the people who had a direct or indirect role in the realization of this thesis. First and foremost, I would like to thank my supervisor Dr. Dipak kumar Mitra, Assistant professor, Department of Mathematical Sciences, Bodoland University, Kokrajhar, Assam for his valuable guidance and constant support throughout this process.

Next I would like thank Dr. K. P. Singh, Associate Professor and HOD Department of Mathematical Sciences, Bodoland University, Kokrajhar, Assam, India. For his support and help in completion of this thesis.

I am thankful to the management, Principal Dr. R N Sinha and faculty of Science College for their encouragement and cooperation.

I would also like to thank Dr. Bhimraj Basumatary, Assistant Professor, Mathematical Sciences, B.U. for this valuable comments help whenever required and I also thankful to all the faculty members of Department of Mathematical Sciences B. U. for their cooperation and support.

I am grateful to all experts who participated in survey of my research work and I also would like to thank the head of departments (Water Resource Department, Assam Disaster Management Authority, All Deputy Commissioners and officials of BTAD for providing reports which are required for my research work.

I am also thankful to all my fellow research scholars for their help and support when ever required.

I would like to thank my all family and loved one for their support along the path of my academic pursuit, especially my father Bipin Kr Brahma, my Mother, my wife Satabdi Brahma, daughters Nabamita Brahma and Jirijir Brahma.

My heartiest thank goes to all my old, new friends and those who directly or indirectly help me in completion this thesis whose names are not mention above.

Finally, I am thankful to Bodoland University for allowing me to submit this thesis.

Ashoke Kumar Brahma
