

LIST OF TABLES

Table No.	Title	Page No.
1	Area estimates of wetlands in Assam	9
2	Biogeographical distribution of freshwater fishes	22
3	Trace minerals important for mammals, birds and fish	32
4	The trace mineral requirement ranges for fish	33
5	Composition of formulated feed	59
6	Mean seasonal variation in Physical and chemical parameters of Water in Kalpani Beel (wetland)	68
7	Physical and chemical characteristics of water collected from four different spots of Kalpani Beel	69
8	Correlation coefficients of physical and chemical parameters of Water from four selected spots of Kalpani Beel	70
9	List of fish species of Kalpani Beel and their conservation status	71-73
10	Number and percent composition of families, genera and species under various orders	73
11	Percentage occurrence of fishes of Kalpani Beel under the conservation status IUCN, 2011	74
12	List of aquatic macrophytic species of the study site recorded during the study period	76-78
13	List of families with number of genera and species of the study site	80
14	Life form of macrophytes of the study area	81
15	Botanical name and used parts of some aquatic plants of Kalpani Beel of Assam, India	82
16	Concentration of minerals (mg/100g) in some selected aquatic plants of Kalpani Beel of Assam, India	83

17	Correlation coefficient between major and minor- element concentrations of selected aquatic plants of Kalpani Beel of Assam,India	84
18	Absorbance peaks their wavelength (nm) and photosynthetic pigments	86
19	Nutritional composition of commercial fish feeds	87
20	Proximate composition of experimental diets	88
21	Growth parameters of <i>Labeo rohita</i> fed experimental diets for 60 days	88
22	Proximate composition of <i>Labeo rohita</i> muscle fed experiment diets (g/100g) on dry weight basis	90
