<b>1 General Introduction</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 Einstein's theory of gravitation . . . . .	1
1.2.1 Principle of covariance . . . . .	2
1.2.2 Principle of equivalence . . . . .	2
1.2.3 Mach's Principle . . . . .	3
1.3 Relativistic cosmology . . . . .	4
1.4 Einstein's field equations . . . . .	4
1.5 Cosmology and cosmological models . . . . .	6
1.6 Cosmological principle . . . . .	8
1.7 Cosmological constant . . . . .	8
1.8 Hubble's law and Hubble's constant . . . . .	10
1.9 Equation of state parameter . . . . .	10
1.10 Deceleration parameter . . . . .	11
1.11 Expansion scalar . . . . .	12
1.12 Anisotropy parameter . . . . .	12
1.13 Shear scalar . . . . .	12
1.14 Perfect fluid and energy-momentum tensor . . . . .	12
1.15 Bulk viscosity . . . . .	13
1.16 Strings and string cosmology . . . . .	14
1.17 Higher dimensional cosmology . . . . .	16
1.18 Robertson-Walker metric . . . . .	17

1.19	Literature review of relevant works on Friedmann-Lemaitre-Robertson-Walker metric . . . . .	18
1.20	Modified theories of gravitation . . . . .	24
1.21	Brans-Dicke scalar-tensor theory of gravitation . . . . .	25
1.21.1	Review on the work related to Brans-Dicke theory . . . . .	29
1.22	Lyra geometry . . . . .	35
1.22.1	Literature review on Lyra Geometry . . . . .	37
1.23	Saez-Ballester scalar-tensor theory . . . . .	44
1.24	Entropy . . . . .	47
1.25	Dark energy . . . . .	47
1.26	Objectives of the thesis . . . . .	49
1.27	Problems investigated . . . . .	49
<b>2</b>	<b>Higher Dimensional Robertson-Walker universe Interacting With Brans-Dicke Field</b>	<b>54</b>
2.1	Introduction . . . . .	54
2.2	Metric and field equations . . . . .	56
2.3	Solution of the field equations . . . . .	58
2.3.1	Case I : $k = 0$ , flat universe . . . . .	59
2.3.2	Case II : $k = 1$ , closed universe . . . . .	60
2.3.3	Case III : $k = -1$ , open universe . . . . .	61
2.4	Physical Interpretations . . . . .	65
2.5	Conclusion . . . . .	65
<b>3</b>	<b>Observations on the role of bulk viscosity in present scenarios of the evolution in FRW model universe</b>	<b>67</b>
3.1	Introduction . . . . .	67
3.2	Metric and field equations . . . . .	71
3.3	Solution of the field equations . . . . .	73
3.4	Discussion . . . . .	83

3.5	Conclusion . . . . .	84
<b>4</b>	<b>Higher dimensional FRW cosmological model in Lyra Geometry</b>	<b>85</b>
4.1	Introduction . . . . .	85
4.2	Field equations and their solutions . . . . .	87
4.3	Solution of the field equations and the model . . . . .	89
4.4	Dynamical and physical parameters of the model . . . . .	90
4.5	Physical Interpretations of the solutions . . . . .	91
4.6	Conclusion . . . . .	104
<b>5</b>	<b>Thermodynamical Approach on FRW spacetime for various Dark energy conditions</b>	<b>105</b>
5.1	Introduction . . . . .	105
5.2	Thermodynamical Behaviour and entropy . . . . .	107
5.3	Einstein field equation and their solutions . . . . .	110
5.3.1	Case : I . . . . .	112
5.3.2	Energy conditions . . . . .	113
5.3.3	Case : II . . . . .	117
5.4	Energy conditions . . . . .	118
5.5	Conclusion . . . . .	123
<b>6</b>	<b>Higher Dimensional FRW model universe in scalar tensor theory of gravitation using Quadratic equation of state</b>	<b>124</b>
6.1	Introduction . . . . .	124
6.2	Metric and field equations . . . . .	125
6.3	Solutions and the models . . . . .	127
6.3.1	Scale factor: de Sitter universe, $R = e^{\alpha t}$ , $\alpha$ is constant . . . . .	127
6.4	Physical Interpretations of the solutions . . . . .	129
6.5	Conclusion . . . . .	134

<b>7 Study on the nature of variable Gravitational and Cosmological constant in higher dimensional FRW model universe</b>	<b>135</b>
7.1 Introduction . . . . .	135
7.2 Field equations . . . . .	137
7.2.1 Case : I Taking $\gamma = 1$ and $k = 1$ . . . . .	139
7.2.2 Case : II Taking $\gamma = 1$ and $k = -1$ . . . . .	140
7.2.3 Case : III Taking $\gamma = \frac{1}{3}$ and $k = 1$ . . . . .	140
7.2.4 Case : IV Taking $\gamma = \frac{1}{3}$ and $k = -1$ . . . . .	141
7.2.5 Case : V Taking $\gamma = 2$ and $k = 1$ . . . . .	141
7.2.6 Case : VI Taking $\gamma = 2$ and $k = -1$ . . . . .	142
7.3 Physical interpretation . . . . .	142
7.4 Conclusion . . . . .	142
<b>8 Conclusions, Limitations and Future Aspects</b>	<b>144</b>
<b>Bibliography</b>	<b>148</b>
<b>List of paper published</b>	<b>182</b>
