

**CONTENTS**

|                              | Page No. |
|------------------------------|----------|
| <b>Abstract</b>              | i        |
| <b>List of Symbols</b>       | v        |
| <b>List of Abbreviations</b> | vii      |

**CHAPTER-1**

|  |      |
|--|------|
| <b>Introduction</b>  | 1-36 |
| 1.1 Introduction   | 2    |
| 1.2 General Relativity                                       | 3    |
| 1.3 Lyra's Geometry  | 7    |
| 1.4 Cosmology and cosmological models                        | 10   |
| 1.5 History of cosmology & accelerated expansion of Universe | 11   |
| 1.6 Bianchi space times                                      | 15   |
| 1.7 String and string cosmology                              | 20   |
| 1.8 Higher dimensional cosmology                             | 21   |
| 1.9 Principles and laws                                      | 23   |
| 1.10 Cosmological parameters                                 | 24   |
| 1.11 Basic terminologies                                     | 27   |
| 1.12 Some candidates of dark energy                          | 32   |
| 1.13 Objectives of the research work                         | 33   |
| 1.14 Methodology and tools                                   | 33   |
| 1.15 Summary of the research work                            | 34   |

**CHAPTER-2**

**Bulk Viscous Fluid Bianchi Type-I String Cosmological Model with Negative Constant Deceleration Parameter** 37-45

|   |    |
|---|----|
| 2.1 Introduction                        | 38 |
| 2.2 Metric and field equations          | 39 |
| 2.3 Solutions of the field equations    | 41 |
| 2.4 Physical and geometrical parameters | 42 |
| 2.5 Physical interpretations            | 43 |
| 2.6 Conclusions                         | 45 |

**CHAPTER-3**

**Mathematical Analysis on Anisotropic Bianchi Type-III Inflationary String Cosmological Models in Lyra Geometry** 46-56

|   |    |
|---|----|
| 3.1 Introduction                        | 47 |
| 3.2 The metric and field equations      | 48 |
| 3.3 Solutions of the field equations    | 51 |
| 3.4 Physical and geometrical parameters | 52 |
| 3.5 Interpretations of the solutions    | 54 |
| 3.6 Conclusions                         | 56 |

**CHAPTER-4**

**Higher Dimensional Bianchi Type-I Cosmological Models with Massive String in General Relativity** 57-67

|  |    |
|--|----|
| 4.1 Introduction                       | 58 |
| 4.2 The metric and the field equations | 59 |
| 4.3 Solutions of the field equations   | 61 |

|                                      |    |
|--------------------------------------|----|
| 4.4 Interpretations of the solutions | 64 |
| 4.5 Conclusions                      | 67 |

## CHAPTER-5

### **Higher Dimensional Bianchi Type-III String Universe with Bulk Viscous Fluid and Constant Deceleration Parameter (DP)** 68-78

|   |    |
|---|----|
| 5.1 Introduction                        | 69 |
| 5.2 Metric and field equations          | 70 |
| 5.3 Solutions of the model              | 72 |
| 5.4 Physical and geometrical parameters | 74 |
| 5.5 Interpretations of the results      | 76 |
| 5.6 Conclusions                         | 78 |

## CHAPTER-6

### **Higher Dimensional LRS Bianchi Type-I String Cosmological Model with Bulk Viscosity in General Relativity** 79-92

|                                      |    |
|--------------------------------------|----|
| 6.1 Introduction                     | 80 |
| 6.2 Metric and field equations       | 82 |
| 6.3 Solutions of the field equations | 84 |
| 6.4 Interpretations of the results   | 89 |
| 6.5 Conclusions                      | 92 |

## CHAPTER-7

### **Higher Dimensional Perfect Fluid Cosmological Model in General Relativity with Quadratic Equation of State (Eos)** 93-102

|                  |    |
|------------------|----|
| 7.1 Introduction | 94 |
|------------------|----|

|                                    |     |
|------------------------------------|-----|
| 7.2 The Metric and field equations | 95  |
| 7.3 Cosmological solutions         | 97  |
| 7.4 Cosmological parameters        | 99  |
| 7.5 Discussions                    | 100 |
| 7.6 Conclusions                    | 102 |

## CHAPTER-8

### **String Cosmological Model in 5-Dimensional Space-Time Interacting with Viscous Fluid** 103-113

|   |     |
|---|-----|
| 8.1 Introduction                              | 104 |
| 8.2 Field equations and their solutions       | 105 |
| 8.3 Dynamical parameters of the model         | 108 |
| 8.4 Physical interpretations of the solutions | 110 |
| 7.5 Conclusions                               | 113 |

## CHAPTER-9

### **Findings and Suggestions** 114-117

### **Bibliography** 118-138

### **Appendix**

|   |         |
|---|---------|
| <i>List of Publications and conference attended</i> | 139-140 |
|---|---------|

*Papers Published in UGC Care Listed Journals*
