<b>Chapter 1: Introduction</b>	<b>1-25</b>
1.1 Biodiesel: An overview	1-3
1.2 Catalysts in biodiesel synthesis	3-8
1.3 Literature review	8-24
1.3.1 Preparation of plant-based heterogeneous catalyst for biodiesel synthesis	8
1.3.2 Composition of solid catalyst obtained from plant materials	11
1.3.3 Waste plant derived heterogeneous base catalyst in biodiesel synthesis	15
1.3.4 Biodiesel properties	23
1.4 Rationale of the present work	25
1.5 Objective of the present study	25
<b>Chapter 2: <i>Heteropanax fragrans</i> (Kesseru) derived catalyst for biodiesel synthesis</b>	<b>26-68</b>
2.1 Introduction	26-27
2.2 Materials and methods	27-31
2.2.1 Materials	27
2.2.2 Methods	28
2.2.2.1 Preparation of catalyst	28
2.2.2.2 Catalyst characterization	28
2.2.2.3 Transesterification of <i>J. curcas</i> oil and characterization of produced biodiesel	29
2.2.2.4 Determination of activation energy and pre-exponential factor	30
2.3 Results and discussion	31-68
2.3.1 <i>H. fragrans</i> catalyst characterization	31
2.3.1.1 XRD analysis	31
2.3.1.2 FT-IR study	33
2.3.1.3 Surface area, pore size and pore volume analysis	34
2.3.1.4 FESEM analysis	35
2.3.1.5 Analysis of elemental composition	37
2.3.1.6 HRTEM analysis	44
2.3.1.7 Measurement of pH value	45
2.3.1.8 Basicity study of <i>H. fragrans</i> catalyst	46
2.3.2 Catalytic activity of the <i>Heteropanax fragrans</i> catalyst	47
2.3.2.1 Effect of calcination temperature of the prepared catalyst	47
2.3.2.2 Effect of catalyst dosage	49
2.3.2.3 Effect of MTOR (methanol to oil ratio)	50

2.3.2.4	Effect of reaction temperature	51
2.3.2.5	Determination of activation energy and pre-exponential factor	52
2.3.3	Comparative study of <i>Heteropanax fragrans</i> catalyst with other reported basic heterogeneous catalysts	53
2.3.4	Reusability study of <i>H. fragrans</i> catalyst	56
2.3.5	Mechanism of transesterification catalysed by <i>H. fragrans</i> derived solid base catalyst.	57
2.3.6	Analysis of <i>J. curcas</i> biodiesel	59
2.3.6.1	FT-IR analysis	59
2.3.6.2	NMR analysis	60
2.3.6.3	GC-MS study of <i>J. curcas</i> biodiesel	64
2.3.6.4	<i>J. curcas</i> biodiesel properties	65
2.4	Conclusion	68
<b>Chapter 3: <i>Musa champa</i> (Chinichampa) peduncle derived catalyst for biodiesel synthesis</b>		<b>69-109</b>
3.1	Introduction	69-70
3.2	Materials and methods	70-72
3.2.1	Materials	70
3.2.2	Methods	71
3.2.2.1	Preparation of catalyst	71
3.2.2.2	Catalyst characterization	71
3.2.2.3	Biodiesel synthesis and characterization	72
3.3	Results and discussion	72-109
3.3.1	Characterization of <i>Musa champa</i> peduncle catalyst	72
3.3.1.1	Powder XRD analysis	72
3.3.1.2	FT-IR analysis	73
3.3.1.3	Determination of surface area, pore size and pore volume	74
3.3.1.4	FESEM analysis	76
3.3.1.5	Elemental composition studies	77
3.3.1.6	HRTEM analysis	84
3.3.1.7	Measurement of pH value	85
3.3.1.8	Determination of soluble alkalinity	86
3.3.1.9	Determination of basicity of the catalyst	87
3.3.1.10	Determination of turnover frequency (TOF)	87
3.3.2	Catalytic activity of the <i>Musa champa</i> peduncle catalyst in biodiesel synthesis	88
3.3.2.1	Effect of catalyst loading	88
3.3.2.2	Effect of methanol to oil ratio (MTOR)	89

3.3.2.3	Effect of temperature on the reaction	90
3.3.3	Comparison of <i>M. champa</i> peduncle catalyst with other reported catalysts	92
3.3.4	Reusability study of <i>Musa champa</i> peduncle catalyst	95
3.3.5	Kinetic and thermodynamic study	96
3.3.5.1	Determination of rate constant and order of reaction	96
3.3.5.2	Determination of activation energy (Ea) and pre-exponential factor (A)	101
3.3.5.3	Study of thermodynamic parameters	101
3.3.6	Characterization of <i>J. curcas</i> biodiesel	103
3.3.6.1	FT-IR analysis	103
3.3.6.2	FT-NMR analysis	105
3.3.6.3	GC-MS analysis of <i>J. curcas</i> biodiesel	105
3.3.7	Fuel properties of the <i>J. curcas</i> biodiesel	106
3.4	Conclusion	109
<b>Chapter 4: <i>Sesamum indicum</i> derived catalyst for biodiesel synthesis</b>		<b>110-141</b>
4.1	Introduction	110-111
4.2	Materials and methods	111-112
4.2.1	Materials	111
4.2.2	Methods	111
4.2.2.1	Preparation of catalyst	111
4.2.2.2	Catalyst characterization	111
4.2.2.3	Transesterification of sunflower oil and characterization of the produced biodiesel	112
4.2.2.4	Determination of biodiesel fuel properties	112
4.2.2.5	Determination of activation energy and pre-exponential factor	112
4.3	Results and discussion	113-141
4.3.1	<i>Sesamum indicum</i> catalyst characterization	113
4.3.1.1	Powder XRD analysis	113
4.3.1.2	FT-IR analysis	114
4.3.1.3	Surface area, pore size and pore volume analysis	115
4.3.1.4	Thermogravimetric analysis	117
4.3.1.5	SEM analysis	117
4.3.1.6	Analysis of elemental composition	118
4.3.1.7	HRTEM analysis	124
4.3.1.8	pH measurement	125
4.3.2	Catalytic activity analysis of <i>Sesamum indicum</i> catalyst	125
4.3.2.1	Effect of catalyst load dosage	125
4.3.2.2	Effect of methanol to oil ratio (MTOR)	126

4.3.2.3	Effect of reaction temperature	127
4.3.3	Comparison of <i>Sesamum indicum</i> catalyst with other reported waste plant derived catalyst	128
4.3.4	Reusability study of the <i>Sesamum indicum</i> catalyst	131
4.3.5	Determination of activation energy and pre-exponential factor	132
4.3.6	Characterization of sunflower oil biodiesel	133
4.3.6.1	FT-IR analysis	133
4.3.6.2	NMR analysis	135
4.3.6.3	GC-MS study	138
4.3.6.4	Properties of sunflower oil biodiesel	139
4.4	Conclusion	141
<b>Chapter 5: <i>Brassica nigra</i> derived catalyst for biodiesel synthesis</b>		<b>142-170</b>
5.1	Introduction	142-143
5.2	Materials and methods	143-144
5.2.1	Materials	143
5.2.2	Methods	143
5.2.2.1	Preparation of catalyst	143
5.2.2.2	Catalyst characterization	143
5.2.2.3	Biodiesel synthesis and characterization	143
5.2.2.4	Determination of activation energy and pre-exponential factor	144
5.3	Results and discussion	144-169
5.3.1	<i>Brassica nigra</i> catalyst characterization	144
5.3.1.1	XRD analysis	144
5.3.1.2	FT-IR analysis	145
5.3.1.3	Surface area, pore size and pore volume analysis	146
5.3.1.4	SEM analysis	148
5.3.1.5	Analysis of elemental composition	148
5.3.1.6	TEM analysis	153
5.3.1.7	pH measurement	154
5.3.2	Catalytic activity study of <i>Brassica nigra</i> catalyst	155
5.3.2.1	Effect of catalyst load dosage	155
5.3.2.2	Effect of methanol to oil ratio (MTOR)	156
5.3.2.3	Effect of reaction temperature	157
5.3.3	Comparison of <i>Brassica nigra</i> catalyst with other reported waste plant derived catalyst.	158
5.3.4	Reusability study of the <i>Brassica nigra</i> catalyst	160
5.3.5	Determination of activation energy and pre-exponential factor	162
5.3.6	Characterization of soyabean oil biodiesel	163

---

5.3.6.1 FT-IR analysis	163
5.3.6.2 NMR analysis	164
5.3.6.3 GC-MS study	167
5.3.6.4 Properties of soyabean oil biodiesel	168
5.4 Conclusion	170
<b>Chapter 6: Summary and conclusion</b>	<b>171-178</b>
6.1 Summary	171-176
6.2 Conclusion	178-178
6.3 Future work	178
<b>List of publications</b>	<b>179-180</b>
