

List of figures

Figure	Description	Page
2.1	Structural feature of pancreas	17
2.2	Cellular structure of pancreas	17
2.3	Human insulin	17
4.1	Morpho-anatomy of <i>Hodgsonia heteroclita</i> fruit	46
4.2	Processed fruit pulp of <i>Hodgsonia heteroclita</i>	46
4.3	Reducing power assay of extract compared to BHT	50
4.4.a	GCMS chromatogram of <i>Hodgsonia heteroclita</i> fruit pulp showing the presence of (1) p-Hydroxybenzoic acid (2) Salisylic acid	54
4.4.b	GCMS chromatogram of <i>Hodgsonia heteroclita</i> fruit pulp showing the presence of (1) o-Coumaric acid (2) p-Coumaric acid	54
4.4.c	GCMS chromatogram of <i>Hodgsonia heteroclita</i> fruit pulp showing the presence of (1) Caffeic acid	54
4.4.d	GCMS chromatogram of <i>Hodgsonia heteroclita</i> fruit pulp showing the presence of (1) Protocatechuic acid (2) Gentisic acid (3) 2,4-Dihydroxy benzoic acid	55
4.4.e	GCMS chromatogram of <i>Hodgsonia heteroclita</i> fruit pulp showing the presence of (1) Vanillic acid	55
4.4.f	GCMS chromatogram of <i>Hodgsonia heteroclita</i> fruit pulp showing the presence of (1) Gallic acid	56
4.4.g	GCMS chromatogram of <i>Hodgsonia heteroclita</i> fruit pulp showing the presence of (1) Ferulic acid	56
4.4.h	GCMS chromatogram of <i>Hodgsonia heteroclita</i> fruit pulp showing the presence of (1) Syringic acid	56
4.5	Estimation of Fasting Blood Glucose Level (FBGL)	60
4.6	The effects of hydro-methanolic extract of <i>Hodgsonia</i> fruit pulp on pancreatic enzymatic	60
4.7	Photomicrographs of rat pancreas by haematoxylene and eosin stain.	62
