

Acknowledgments

This Ph.D. thesis entitled as “*In vitro* and *in vivo* studies on antioxidative and antihyperglycemic effects of *Hodgsonia heteroclita* fruit pulp” is a culmination of the research work done by me under the department of Biotechnology, Bodoland University, Kokrajhar, BTC, Assam, India, during a period of almost 2013-2018. This time period was the challenging interlude for me with many efforts. This pinnacle could not be possible without supports, suggestions, inspirations and necessary help of several individuals around me.

At the very beginning, I would like to express my cordial thankfulness to my guide Dr. Birendra Kumar Brahma, Department of Biotechnology, Bodoland University, for his precious supervision, advice and constant encouragements all along in my research. This culmination become possible for his brilliant arrangements and constantly obligatory suggestions and focusing to achieve the goal. Thank you sir, for your kind escorts to me throughout the research realm from the very beginning.

I express my special thankfulness to Dr. Arvind Kumar Goyal, Assistant Professor, Department of Biotechnology and Head, Centre for Bamboo Studies, Bodoland University, who constantly intended for and inspired me by essential suggestions as well as demonstrative arrangements throughout the research work and who shared several difficulties in my research period.

I extend my thankfulness to the Honb’le Vice-Chancellor, Prof. Hemanta Kumar Baruah, Respected Registrar, Dr. Sekhar Brahma and all the administrative personnel of Bodoland University for their authoritative approval and necessary help in my research work.

I state an intense sense of gratitude to Dr. Sandeep Das, Head of the Department, Biotechnology, Bodoland University for his valuable suggestions, kind inspirations and providing necessary arrangements throughout my Ph.D. research work as well as the course works.

I convey my gratefulness to respected teaching and non-teaching staff of the Department of Biotechnology and Centre for Bamboo Studies for their

imperative endorsement, suggestions, inspirations and necessary help in my research work.

I convey my gratefulness to late Dr. T.L. Santha, Director, MLACW and Dr. M.B. Nagaveni, (HOD), Biotechnology and Biochemistry, Maharani Lakshmi Ammanni College for Women, Malleswaram, Bengaluru, for allowing me an authoritative approval to pursue the experimental research work in their institution.

I express my infinite thankfulness to Dr. Sushil Kumar Middha and Smt. Usha Talambedu, Department of Biotechnology and Biochemistry, Maharani Lakshmi Ammanni College for Women, Malleswaram, Bengaluru for allowing and steering me to execute the animal model experimentation in their organised laboratory (Life Sciences Research Centre) and spending their valuable time for completion of my experimental research work as well as joint publications.

I extend my thankfulness to Dr. A. A. Mao, Scientist-‘F’, Joint Director, BSI, Eastern Regional Centre, Shillong, Dr. Ranjit Daimary and Ms. Chaya Deori for their significant resourcefulness for identification and authentication of my research specimen.

Words evade me to express a great debts of thankfulness to my father Sri Bibekananda Narzary, mother Lt. Sukyati Narzary and all my family members for their constant inspirations with financial, love, and moral support in my academic life.

I would like to express my heartfelt debts of gratitude with special appreciation to my beloved wife Smt. Rwisumwi Brahma, sons Master Daogasar Narzary and Master Jafungsar Narzary whose dedication, love and constant co-operative motivation shouldered me to achieve this milestone and with whom I shared all the joys and sorrows.

Besides, I extend my thankfulness to all scholar associates for uphold of excellent spirit of research environment with kind co-operations.

I am extremely indebted to dear villagers of my native village Jainary and Balajan Tinali (Bazar Area) who shared lot of information and everyone who directly or indirectly helped me to achieve this research successfully.

I bow, my head in front of the Almighty God for whose graces a good luck glowed me for having the opportunity of completion of this research programme.

My deepest apology extend to all whose name could not be mentioned individually herewith.

Lastly I express that any error or inadequacy which remained in this work is undoubtedly my own liability.

With regards

Derhasat Narzary
