

List of Figures

2.1	Research design.	44
3.1	Energy densities of DE ρ_d and DM ρ_m with t when $l_0 = l_1 = m_0 = m_1 = 1, k = 13.80497512437811$	57
3.2	Overall density parameter Ω , DE density parameter Ω_d and DM density parameter Ω_m with t when $l_0 = l_1 = m_0 = m_1 = 1, k = 13.80497512437811$	58
3.3	EoS parameter ω with t when $l_0 = l_1 = m_0 = m_1 = 1, k = 13.80497512437811$	58
3.4	Spatial volume V with t when $l_1 = m_1 = 1, k = 13.80497512437811$	59
3.5	Scalar expansion θ with t when $k = 13.80497512437811$	60
3.6	DE pressure p_d with t when $l_1 = m_0 = m_1 = 1, k = 13.80497512437811$	60
3.7	Hubble parameter H with t when $k = 13.80497512437811$	61
3.8	Variation of the shear scalar σ^2 with t when $k = 13.80497512437811$	61
3.9	Variation of φ with t when $c_1 = c_2 = 1$	62
3.10	Variation of φ with t when $c_1 = -1, c_2 = 1$	62
4.1	Variation of the energy densities of DE ρ_d and DM ρ_m with t when $a_0 = b_0 = c_1 = c_2 = k = 1, u = 2.78, v = \frac{1}{2}$	72
4.2	Variation of the spatial volume V with t when $c_1 = c_2 = k = 1, u = 2.78, v = \frac{1}{2}$	72
4.3	Variation of the expansion scalar θ with t when $c_2 = k = 1, u = 2.78, v = \frac{1}{2}$	73
4.4	Variation of the DE pressure p_d with t when $b_0 = c_1 = c_2 = k = 1, \omega = -1, u = 2.78, v = \frac{1}{2}$	74
4.5	Variation of the Hubble parameter H with t when $c_2 = k = 1, u = 2.78, v = \frac{1}{2}$	75
4.6	Variation of the shear scalar σ^2 with t when $c_2 = k = 1, u = 2.78$ and $v = \frac{1}{2}$	75
4.7	Variation of the overall density parameter Ω , DE density parameter Ω_d and DM density parameter Ω_m with t when $a_0 = b_0 = c_1 = c_2 = k = 1, u = 2.78$ and $v = \frac{1}{2}$	76
5.1	Variation of spatial volume V with time t when $l = m = 1, k = 3.45497$ showing its increasing nature throughout the evolution.	88
5.2	Variation of scalar expansion θ with time t when $l = m = 1, k = 3.45497$ showing its increasing nature throughout the evolution.	88

5.3	Variation of energy density ρ with time t when $l = m = 1, k = 3.45497$ showing its transition from being negative to positive during evolution.	89
5.4	Variation of pressure p with time t when $l = m = 1, k = 3.45497$ showing its negative nature all through.	89
5.5	Variation of displacement vector β with time t when $d = -1, k = 3.45497$ showing its decreasing nature.	90
5.6	Variation of deceleration parameter q with time t when $l = m = 1, k = 3.45497$	91
5.7	Variation of Hubble parameter H with time t when $k = 3.45497$	91
5.8	Variation of shear scalar σ^2 with time t when $l = m = 1, k = 3.45497$	92
6.1	Variation of the spatial volume V with t when $a = b = 1, k = 15$	100
6.2	Variation of the expansion scalar θ with t when $a = b = 1, k = 15$	100
6.3	Variation of the pressure p and energy density ρ with t when $\lambda = -5.06911$	101
6.4	Variation of the pressure p and energy density ρ with t when $\lambda = -12.5856$	101
6.5	Variation of the DE EoS ω with t when $a = b = 1, k = 15, \lambda = -5.06911$	102
6.6	Variation of the Hubble parameter H with t when $k = 15$	103
6.7	Variation of the scalar scalar σ^2 with t when $k = 15$	103
6.8	Variation of the scalar curvature R with t when $k = 15$	104
7.1	Volume V increasing with t when $x = y = 1, z = 13.8049$	111
7.2	Expansion scalar θ increasing with t when $z = 13.8049$	112
7.3	Pressure p ranging in the negative plane when $c = 1, n = 0.2, z = 13.8049$	113
7.4	Energy density ρ increasing with t when $c = 1, n = 0.2, z = 13.8049$	113
7.5	EoS parameter ω with t when $n = 0.2$ showing that it tends very close to -1 in the future.	114
7.6	Shear scalar σ^2 with t when $z = 13.8049$	114
7.7	Gravitational constant G decreasing with t when $c = 1$	115
8.1	Variation of energy density of DE ρ_d and matter ρ_m with time t when $a_0=b_0=a_1=b_1=1, c_1=14.301443981790266$ showing that ρ_m decreases throughout evolution whereas ρ_d tends to increase very slowly or is nearly unchanged.	126
8.2	Variation of pressure of DE p_d with time t when $b_0=a_1=b_1=1, c_1=14.301443981790266$ showing it varies in the negative plane throughout evolution.	126
8.3	Variation of spatial volume V with time t when $a_1=b_1=1, c_1=14.301443981790266$ showing that it increases with time.	127
8.4	Variation of scalar expansion θ with time t when $c_1=14.301443981790266$ showing that it increases with time.	128

8.5	Variation of shear scalar σ^2 with time t when $c_1=14.301443981790266$. . .	128
8.6	Variation of overall density parameter Ω , DE density parameter Ω_d and matter density parameter Ω_m with time t when $a_0=b_0=a_1=b_1=1$, $c_1=14.301443981790266$ showing that Ω and Ω_d decrease and tend to become constant whereas Ω_m decreases with a greater extent.	129
