

Table of contents

List of figures	xiv
1 General Introduction	1
1.1 Introduction	1
1.2 History of Cosmology and Cosmological Models	2
1.3 Einstein's Theory of Gravitation:	5
1.4 Weyl's Geometry:	8
1.5 Lyra's Geometry:	11
1.6 Field Equations in Lyra's Geometry:	14
1.7 Some Aspects of the Work Related to Lyra's Geometry:	15
1.8 Bianchi Space-Times:	22
1.9 Some Aspects of the Work Related to Bianchi Space-Times:	23
1.10 Strings and String Cosmology:	29
1.11 Higher Dimensional Cosmology:	31
1.12 Dark Energy:	32
1.13 Perfect Fluid and Energy-Momentum Tensor:	34
1.14 Hubble's Law and Hubble's Constant:	35
1.15 Deceleration Parameter:	36
2 Whether Lyra's Manifold itself is a Hidden Source of Dark Energy	38
2.1 Introduction	38
2.2 Field Equation and Their Solutions	42
2.3 Physical Interpretation of the Solutions:	51
2.4 Conclusion:	53
3 Five Dimensional String Universes In Lyra Manifold	54
3.1 Introduction	54
3.2 Field Equations and their Solutions:	55

3.3	Physical Interpretations of the Solutions:	58
4	Higher Dimensional LRS Bianchi Type-I Cosmological Model Universe Inter-acting with Perfect Fluid in Lyra Geometry	59
4.1	Introduction:	59
4.2	Field Equations and Their Solutions:	61
4.3	Physical and Geometrical Properties of the Solutions:	68
4.4	Conclusion	70
5	Higher Dimensional Cosmological Model Universe with Special Law of Hubble's Parameter in Lyra Geometry	71
5.1	Introduction:	71
5.2	Field Equations and Their Solutions:	74
5.3	Physical and Geometrical Properties of the Solutions:	90
5.4	Conclusion:	91
6	Higher Dimensional Cosmological Model Universe with Quadratic Equation of State in Lyra Geometry	93
6.1	Introduction:	93
6.2	Field Equations and their Solutions:	96
6.3	Physical and Geometrical Properties of the Solutions:	101
6.4	Conclusion:	102
7	On Bianchi Type III Cosmological Model with Quadratic EoS in Lyra Geometry	103
7.1	Introduction:	103
7.2	Field Equations and their Solutions:	106
7.3	Physical and Geometrical Properties of the Model Universe:	116
7.4	Conclusion:	117
8	Bianchi Type III Cosmological Model with Hybrid Scale Factor in Presence of Van der Waal Fluid in Lyra Manifold	118
8.1	Introduction:	118
8.2	Field Equations and their Solutions:	121
8.3	Physical Interpretations of the Solutions:	128
8.4	Conclusion:	130

9	Could the Lyra Manifold be the Hidden Source of the Dark Energy ?	131
9.1	Introduction:	131
9.2	Formulation of Problem:	135
9.3	Solution of Field Equations in Four Different Cases (of Deceleration Parameter):	138
9.3.1	Case-I: Models with Time Dependent Deceleration Parameter: . . .	138
9.3.2	Case-II: Models with Variable Deceleration Parameter:	142
9.3.3	Case-III: Models with Linearly Varying Deceleration Parameter: . .	155
9.3.4	Case-IV: Models with Special form of Deceleration Parameter: . . .	159
9.4	Physical Interpretations of the Solutions:	163
9.4.1	Case-I: Models with Time Dependent Deceleration Parameter: . . .	163
9.4.2	Case-II: Models with Variable Deceleration Parameter:	165
9.4.3	Case-III: Models with Linearly Varying Deceleration Parameter: . .	167
9.4.4	Case-IV: Models with Special form of Deceleration Parameter: . . .	168
9.5	Conclusion:	169
10	Findings and Suggestions of the Thesis	171
	Bibliography	172
