Acknowledgement	iii-v
List of tables, figures, plates	vi-ix
List of abbreviations	x
CHAPTER 1: INTRODUCTION	1-5
1.1 General Introduction	1-2
1.2 Taxonomy of the genus	2-3
1.3 Distribution of genus <i>Ophiorrhiza</i>	3-4
1.4 Significance of the present study	4-5
1.5 Aim and Objectives	5
CHAPTER 2: REVIEW OF LITERATURE	6-14
2.1 Taxonomic Studies	6-8
2.2 Review of the medicinal importance	8-9
2.3 Morphology	9-10
2.4 Foliar epidermis	10-11
2.5 Leaf architecture	11-12
2.6 Anatomy	12-13
2.7 Environmental Niche Modeling	13-14
CHAPTER 3: MATERIALS AND METHODS	15-21
3.1 Study area	15-16
3.2 Exploration and Collection of fresh specimens	16-17
3.3 Consultation of literatures and herbarium	17
3.4 Preparation of distribution Map	17
3.5 Macromorphological study	18
3.5.1 Taxonomic enumeration	18
3.6 Micromorphological study	19
3.6.1 Foliar epidermal study	19
3.6.1(i) Foliar epidermal analysis by light microscope	19

3.6.1(ii) Foliar epidermal analysis by SEM	19
3.6.1(iii) Quantitative analysis	19-20
3.6.2 Test for significance difference of quantitative data	20
3.6.3 Leaf architecture study	20
3.7 Anatomical study	20
3.8 Assessment of habitat status and identification of areas for reintroduction	21
CHAPTER 4: RESULTS	22-126
4.1 Systematic enumeration of the genus <i>Ophiorrhiza</i>	22-42
4.1.1 Key to the species	24
4.2 Foliar epidermal study	64
4.2.1 Key to the species on the basis of foliar epidermal features	64
4.2.2 Foliar epidermal characters of the studied species	65-73
4.2.3 ANOVA Test	73
4.3 Leaf architecture study	87
4.3.1. Key to the species based on leaf architecture characters	87
4.3.2 Leaf architectures characters of the studied species	88-94
4.4 Anatomical study	105
4.4.1 Anatomical characters of the investigated species	105-110
4.5 ENM study	121
4.5.1 Results	121-126
CHAPTER 5: DISCUSSION	127-143
5.1 Taxonomy of the genus <i>Ophiorrhiza</i> L. in Assam	127
5.1.1 New findings and critical notes	127-128
5.2 Morphological peculiarities	132
5.2.1 Report of the occurrence of vivipary	132
5.2.2 Morphological variations	132
5.2.3 Heterostyly	132-133
5.3 Macro and micromorphological significance	133
5.3.1 Macromorphological findings	133-134

5.3.2 Micromorphological significance on foliar epidermal studies of the investigated taxa	134
5.3.2.1 Qualitative foliar epidermal study	134-135
5.3.2.2 Quantitative foliar epidermal study	135-136
5.3.2.3 ANOVA analysis	135
5.3.3 Micromorphological significance on leaf architecture studies	136
5.3.3.1 Qualitative leaf architecture study	136
5.3.3.2 Quantitative leaf architecture study	137-138
5.4 Anatomical significance of the species within the genus	138
5.5 Studies using Ecological Niche modeling (ENM) on threatened species	138-139
CHAPTER 6: SUMMARY	144-146
REFERENCES	147-171
APPENDIX 1	172-175
APPENDIX 2	176
APPENDIX 3	177-181
APPENDIX 4	182
APPENDIX 5	183
APPENDIX 6	184-185
