

Scientific validation of the formulation and evaluation of polyherbal dosage for hepatoprotective activity prescribed by the local medicinal practitioner of BTR, Assam, India

Thesis submitted to the Bodoland University for the award of
Doctor of Philosophy
in
Biotechnology under the Faculty of Science and Technology

By
Banjai Mochahary

Reg no: FINAL.BIO00211 of 2019-2020

Debargaon, P.O. Rangalikhata
Kokrajhar - 783370, BTAD, Assam.

Certificate

I certify that **Mr. Banjai Mochahary** has prepared the thesis entitled "*Scientific validation of the formulation and evaluation of polyherbal dosage for hepatoprotective activity prescribed by the local medicinal practitioner of BTR, Assam, India*", for the award of Ph.D. degree in Biotechnology by Bodoland University, under my supervision. The thesis has not been previously produced for the award of any degree, diploma or other research title.

Declaration

I declare that the thesis entitled "*Scientific validation of the formulation and evaluation of polyherbal dosage for hepatoprotective activity prescribed by the local medicinal practitioner of BTR, Assam, India*" has been prepared by me under the supervision of Dr. Arvind Kumar Goyal of Department of Biotechnology, Bodoland University, Kokrajhar. No part of this thesis has formed the basis for the award of any degree or fellowship previously.

Acknowledgement

The present compilation is the result of comprehensive work of my Ph.D. thesis from the Department of Biotechnology, Bodoland University, Kokrajhar, Assam, during a period of 2019-2024. The entire period was undoubtedly one of the most intensive stages of my life and it would have been impossible without the collective supports, inspiration and valuable suggestions of several individuals.

First and foremost, I would like to thank my supervisor, Dr. Arvind Kumar Goyal, Department of Biotechnology, Bodoland University, for his invaluable guidance and support throughout my Ph.D. studies. His expertise, patience, and encouragement have been instrumental in my academic and personal growth. I am particularly grateful for his willingness to share his insights and experience, and for his unwavering belief in my abilities.

I would like to extend my sincere gratitude to the Head of Department, Prof. Sandeep Das and all other teaching and non-teaching staffs, Department of Biotechnology, BU for their careful review of my work and their insightful feedback.

I extend my deepest appreciation to Hon'ble former Vice-Chancellor, Prof. Laishram Ladu Singh, Hon'ble Vice-Chancellor, Prof. Babu Lal Ahuja, Registrar, Dr. Subung Basumatary, Academic Registrar, Dr. Manjil Basumatary, Deputy Registrar (Academics), Dr. Prahlad Basumatary, and all the administrative personnel of Bodoland University for their visionary leadership and dedication to fostering an environment of academic excellence.

I would like to acknowledge the financial support I have received from the Ministry of Tribal Affairs, Government of India for granting me the prestigious National Fellowship for ST vide award no. 201920-NFST-ASS-01737 dated 10/04/2020. These funds have been essential for enabling me to conduct my research and pursue my academic goals. And I am also thankful to Department of Biotechnology, Ministry of Science and Technology, Government of India for the project grant vide letter No. BT/IN/Indo-US/Foldscope/39/2015 under the scheme "Proposal for use of Foldscope as a research tool" which immensely helped me to carry out the preliminary Ph.D. studies.

I extend my sincere thanks to the Director of MLACW, Head, Department of Biotechnology and Biochemistry, Maharani Lakshmi Ammanni College for Women (Autonomous), Malleswaram, Bengaluru, for allowing me an authoritative approval to pursue the experimental research works in their institution.

I extend my sincere appreciation to Dr. Sushil Kumar Middha and Dr. Usha Talambedu, Department of Biotechnology and Biochemistry, Maharani Lakshmi Ammanni College for Women, Bengaluru for guiding me in conducting the experiments in their organised laboratory and devoting their precious time to complete my experimental research studies.

With deepest appreciation, I extend my sincere thanks to Mrs. Sorola Narzary, Local Traditional Healer, for giving me permission and allowing me to use her polyherbal formulations for my Ph.D. studies.

I extend my sincere thanks to Dr. K. Karthigeyan, Scientist- 'E', BSI, Howrah and Dr. Sanjib Baruah, Assistant Professor, Department of Botany, Bodoland University for their significant resourcefulness in identification and authentication of my research specimens.

I express my whole hearted thanks to Dr. Amit Swarnakar, Medical Officer (Ayu.), Medical Unit, Bodoland University, for his valuable suggestions and time in shaping my Ph.D. thesis.

I also owe my sincere gratitude to M.Sc. students Ms. Nidhi Dwivedi, Ms. KN Hemavathi, Ms. KA Akshaya and Ms. R Soumya, Department of Biotechnology, Maharani Lakshmi Ammanni College for Women, Bengaluru, for their unwavering assistance in carrying out my animal experimentation studies.

I extend my heartiest thanks to Mrs. Bijanta Bala Brahma, Mr. Jangila Basumatary and Mr. Karma Goyary, Center for Bamboo Studies, Bodoland University, for their continuous support and cooperation throughout my research studies.

I am indebted to my parents and family members for their unwavering love and encouragement. Their understanding and patience have been my pillars of strength, and I am grateful for their support throughout this demanding journey.

I extend my special appreciation to my wife Mrs. Momita Narzary for her unending moral support, encouragement and motivation to carry out my research studies and achieve this milestone.

Furthermore, I wish to express my genuine gratitude to all my fellow scholars Ms. Sudem Brahma, Mr. Mrinal Kalita, Ms. Illora Narzary and Ms. Sangita Das for fostering an environment of exceptional research spirit and for their kind collaboration.

Finally, I would like to express my heartfelt thanks to all my friends who provided emotional support, encouragement, and occasional distractions when needed. Your friendship has made this challenging undertaking more enjoyable and fulfilling.

List of Tables

Table	Title	Page #
1.1	Drugs responsible for liver diseases	18
2.1	List of polyherbal formulations and its constituents along with experimental model and effect on various parameters related to liver disorders	31
2.2	List of plant parts and its compound with hepatoprotective activity	71
3.1	The name of components of <i>LivSwasthya</i> and their GPS coordinate	95
4.1	Represents information gathered from the local traditional healer residing in the different districts of BTR, Assam	114
4.2	Organoleptic properties of powdered plant's part under study	115
4.3	Phyto-chemical analysis on aqueous extracts of <i>LivSwasthya</i>	116
4.4	Physical characteristics of the powder of <i>LivSwasthya</i>	118
4.5	Determination of heavy metals in <i>LivSwasthya</i>	119
4.6	DPPH radical scavenging activity by <i>LivSwasthya</i> and standard	120
4.7	Components identified from the Aqueous extract of <i>LivSwasthya</i> by GCMS analysis	123
4.8	Effect of <i>LivSwasthya</i> on antioxidant enzyme GPx and GSSH	124
4.9	Effect of <i>LivSwasthya</i> on antioxidant enzyme SOD	132
4.10	Effect of <i>LivSwasthya</i> on antioxidant enzyme MDA	133
4.11	Effect of <i>LivSwasthya</i> AE on total bilirubin and direct bilirubin	134
4.12	Effect of <i>LivSwasthya</i> AE on SGPT levels	134
4.13	Effect of <i>LivSwasthya</i> AE on SGOT levels	135
4.14	Blood tests conducted to measure specific parameters related to lipid levels and glycaemic control using <i>LivSwasthya</i>	136
4.15	Effect of <i>LivSwasthya</i> AE on serum biochemical parameters in CCl ₄ induced liver damage in rats	137

List of Figures

Figure	Title	Page #
1.1	Structure and microstructure of Liver.	5
4.1	Photomicrograph of microscopic evaluation of <i>LivSwasthya</i> powder	115
4.2	Ferric reducing power showing linear curve of ascorbic acid standard.	121
4.3	Ferric reducing power assay of aqueous extract of <i>LivSwasthya</i> compared to standard ascorbic acid.	121
4.4	GC-MS/MS chromatogram of the aqueous extract of PHF	122
4.5	Histopathologic section of liver	139
