

CONTENTS

Title	Page No.
Chapter 1 Introduction	1-5
1.1 Fermented fish product	3
1.2 Micro-organisms isolated and studied in fermented fish	3-4
1.3 Traditional fermented fish <i>napham</i>	4-5
1.4 Aim and objectives	5
Chapter 2 Literature Review	6-22
2.1 History of fermented food	6-7
2.2 Types of fermented food	7
2.3 Health benefits of fermented food	8-9
2.4 Fermented Fish	9-10
2.5 Origin and cultural perspective of fermented fish	10
2.6 Manufacturing process and diversity of fermented fish	10-12
2.7 Fermented fish of Northern Europe	12-13
2.8 Fermented fish products of Africa	13
2.9 Fermented fish products of Asia	13-14
2.10 Fermented fish products of India	15
2.11 Health Benefits	16
2.12 Health Concern	17
2.13 Biochemical composition of fermented fish of product	17-19
2.14 Microbiota of fermented fish products	19-20
2.15 Methodologies used for characterizing the microbiota in fermented fish	20-22
Chapter 3 Materials and Methods	23-34
3.1 Documentation of preparation of <i>napham</i>	23-24
3.2 Collection of samples	24
3.3 Biochemical Analysis	24-26
3.3.1 Proximate analysis	24
3.3.1.1 Moisture content	24

3.3.1.2 Determination of ash content(AOAC,2000)	24
3.3.1.3 Determination of pH	25
3.3.1.4 Determination of crude fat(AOAC,2000)	25
3.3.1.5 Determination of crude protein(Kjeldahl,AOAC,2000)	25
3.3.2 Analysis of Minerals and trace elements	26
3.3.3 Analysis of Amino acids	26
3.3.4 Analysis of Fatty Acids and volatile compounds	26
3.4 Microbial Analysis: Enumeration of the total cultivable microbes	26-28
3.4.1 Sample homogenate preparation	26
3.4.2 Isolation of Micro-organism	27-28
3.5 Whole metagenome study through Next Generation Sequencing	28-29
3.5.1 DNA extraction	29
3.5.2 Library construction and whole genome metagenomic Sequencing	29
3.5.3 Data Analysis and Bioinformatics	29
3.5.4 Fasta QC & Filter	30
3.5.5 <i>De novo</i> Assembly	30
3.5.6 Protein Homology Search	30
3.5.7 Functional Annotation	30
3.6 16S rRNA Metagenomic analysis	31-34
3.6.1 Extraction of genomic DNA and Amplicon Generation	32
3.6.2 PCR Products quantification and qualification	32
3.6.3 PCR Products Mixing and Purification	32-33
3.6.4 Sequencing data processing	33
3.6.5 OTU cluster and Species annotation	33
3.6.6 Alpha Diversity	33-34
Chapter 4 Result	35-86
4.1 Documentation and procedure of making <i>napham</i>	35
4.1.1 Raw Material used	35-36

4.1.2 Procedure (Photoplate I)	36-37
4.1.3 Culinary preparation from <i>napham</i>	37
4.1.4 Cultural values and livelihood prospects of <i>napham</i>	38
4.2 Biochemical analysis	38
4.2.1 Proximate composition of <i>napham</i>	38
4.2.2 Analysis of Minerals and trace elements	39
4.2.3 Analysis of Amino acid	39-40
4.2.4 Fatty acid composition	41-44
4.3 Microbial Analysis: Enumeration of microbial community	44-45
4.4 Whole metagenome analysis	45-67
4.4.1 Raw read of the sample	46-47
4.4.2 Base quality score distribution	47
4.4.3 Base composition distribution	47-51
4.4.4 GC distribution	51-52
4.4.5 <i>De novo</i> Metagenome Assembly	52-54
4.4.6 Analysis of dominant population	55
4.4.7 Taxonomic Analysis	55-63
4.4.8 Analysis of Functional Diversity	64-67
4.5 16 S <i>rRNA</i> metagenome analysis	67-86
4.5.1 Sequencing data processing	68-69
4.5.2 OTU analysis and species annotation	69
4.5.3 OTU clustering and species annotation and statistical analysis of annotation	69-70
4.5.4 GraPhlAn display	71-73
4.5.5 Phylogenetic Tree	74-75
4.5.6 Species distribution and Species relative abundance layout	76-81
4.5.7 Alpha Diversity Indices	82-84
4.5.8 Species Diversity Curves	85-86
Chapter 5 Discussion	87-102
Chapter 6 Conclusion	103
Chapter 7 Summary	104-108
