List of figures	vi-vii
List of photo plates	viii
List of tables	ix-xi
Abbreviation used	xii-xiii
CHAPTER 1: INTRODUCTION	
1.1 General account	1-4
1.2 Choices of the present work	4-5
1.3 Aim and objectives	6
CHAPTER 2: REVIEW OF LITERATURE	
2.1 Historical background with diversity study	7-10
2.2 Antioxidant activity of lichen	10-11
2.3 Cytotoxic activity of lichen	11-12
2.4 Antimicrobial activity of lichen	12-13
CHAPTER 3: MATERIALS AND METHODS	
3.1 Study area	14-20
3.2 Collection of the specimens	20
3.3 Identification of the specimens	21-23
3.3.1 Morphological observation	21
3.3.2 Anatomical observation	21
3.3.3 Spot test	21-22
3.3.4 Microcrystallography	22
3.3.5 Thin Layer Chromatography	22
3.3.6 Identification of lichen taxa and endemic species	22-23
3.4 Lichen herbarium	23
3.5 Preparation of Keys	23
3.6 Ecological parameters	23-24
3.6.1 Frequency	23

3.6.2 Relative abundance	23-24
3.7 Phytochemical analysis of <i>Anzia ornatoides</i>	24
3.7.1 Preparation of lichen extract	24
3.7.2 Preliminary phytochemical screening	24
3.8 Antioxidant activity of <i>Anzia ornatoides</i>	24-27
3.8.1 Total phenolic contents	24
3.8.2 Total flavonoid contents	25
3.8.3 Phosphomolybdenum assay	25
3.8.4 Ferric-reducing antioxidant power assay	25-26
3.8.5 Scavenging DPPH radicals	26
3.8.6 ABTS assay	26-27
3.8.7 Determination of inhibitory activity toward lipid peroxidation	27
3.9 Cytotoxic activity of <i>Anzia ornatoides</i>	27-29
3.9.1 Cell culture and reagents	27
3.9.2 Determination of cytotoxicity by MTT assay	27-28
3.9.3 Fluorescence imaging for the detection of apoptosis	28
3.9.4 Flow cytometry for the detection of apoptosis	28
3.9.5 In-vitro toxicity analysis	28-29
3.10 Antimicrobial activity of <i>Anzia ornatoides</i>	29-30
3.10.1 Test microorganisms	29
3.10.2 Disc diffusion assay	29
3.10.3 Agar-well diffusion assay	29-30
3.10.4 Determinations of MIC, MBC, and MFC values	30
3.11 GC-MS analysis	30-31
3.12 Photo plates	31
3.13 Statistical analysis	31

CHAPTER 4: RESULTS

4.1 Lichen diversity	32-42
4.2 Taxonomic Keys	42-45
4.3 Taxonomic enumeration	45-187
4.4 Analysis of lichen diversity	187
4.5 Interesting facts	187-213

4.5.1 New findings	187
4.5.2 New additional records to India	188-190
4.5.3 New distributional records to Assam	190-198
4.5.4 New distributional taxa to BTR	198-209
4.5.5 Endemic taxa	209-213
4.6 Ecological parameters	213-214
4.6.1 Frequency	213-214
4.6.2 Relative abundance	214
4.7 Discussion	214-222
4.7.1 Analysis	214-215
4.7.2 Comparison of lichen families of UFR with lichens of Assam	215-217
4.7.3 Lichen species used by ethnic groups	217-218
4.7.4 Affinities with other countries	218-219
4.7.5 Present status and future threats of UFR	219-221
4.7.6 Conservation strategies	221-222
CHAPTER 5: RESULTS	
5.1 Phytochemical analysis of <i>Anzia ornatoides</i>	225-228
5.1.1 Extraction yield	225
5.1.2 Preliminary phytochemical screening of <i>Anzia ornatoides</i>	225-226
5.1.3 GC-MS analysis	226-228
5.2 Antioxidant activity of <i>Anzia ornatoides</i>	228-235
5.2.1 Total phenolic contents	228-229
5.2.2 Total flavonoid contents	229
5.2.3 Phosphomolybdenum assay	229-230
5.2.4 Ferric-reducing antioxidant power assay	230-231
5.2.5 Scavenging DPPH radicals	231-232
5.2.6 ABTS assay	232-234
5.2.7 Inhibitory activity towards lipid peroxidation	234-235
5.3 Discussion	236-237
CHAPTER 6: RESULTS	
6.1 Cytotoxicity activity of <i>Anzia ornatoides</i>	238-242
6.1.1 Evaluation of cytotoxicity potential	238

6.1.2 Immunofluorescence imaging to detect apoptosis	238-241
6.1.3 Flow cytometry and confocal analysis for apoptosis	241-242
6.1.4 In-vitro toxicity analysis	242
6.2 Discussion	242-244
CHAPTER 7: RESULTS	
7.1 Antimicrobial activity of <i>Anzia ornatoides</i>	245-250
7.1.1 Disc-diffusion assay	245-247
7.1.2 Agar-well diffusion assay	247-248
7.1.3 MIC	248-249
7.1.4 MBC and MFC	249-250
7.2 Discussion	250-251
CHAPTER 8: CONCLUSION	252-253
