Abstract	iv
List of Figures	vii
List of Abbreviations	x
List of Symbols	xii
1 Introduction	1
1.1 The Basic Facts of Cosmology	1
1.2 Standard Cosmology	2
1.3 Kaluza-Klein Theory	3
1.4 Higher Dimensional Cosmology	4
1.5 The Cosmological Principle	5
1.6 Cosmological Models	7
1.7 Standard Model of Cosmology	7
1.8 Dark Energy and Dark Matter	8
1.8.1 Dark Energy	8
1.8.2 Dark Matter	9

1.9	Hubble's Law and Hubble's Constant	11
1.10	Some Important Cosmological Parameters	12
1.10.1	Cosmological Constant	12
1.10.2	Deceleration Parameter	13
1.10.3	Hubble's Parameter	14
1.10.4	Equation of State Parameter	14
1.10.5	Scale Factor of the Universe	15
1.11	Strings and String Cosmology	15
1.12	Conharmonic Transformation	18
1.13	Energy Momentum Tensor for Perfect Fluid	19
1.14	The Jerk Parameter (j)	20
1.15	Statefinder Parameter (r, s)	20
1.16	Review of some work related to Five Dimensional Kaluza-Klein Space-Time	21
1.17	Objectives:	28
1.18	Methodology and Tools:	28
2	Five Dimensional Kaluza-Klein Dark Energy Cosmological Model under Two-Fluid Scenario with Variable Deceleration Parameter	29
2.1	Introduction	29
2.2	Metric and Field Equations	31
2.3	Solution of the Field Equations	32
2.4	Case-I: Non-Interacting Two Fluid Model	34
2.5	Case-II: Interacting Two Fluid Model	35
2.6	Physical Interpretation of the Solutions	37
3	Anisotropic Cloud String Cosmological Model with Five Dimensional Kaluza-Klein Space-Time	42
3.1	Introduction	42
3.2	Metric and Field Equations	44
3.3	Solution of the Field Equations	45
3.4	Physical Parameters of the Model and its Behaviour	47

4	Two-Fluid Scenario for Dark Energy Cosmological Model in Five Dimensional Kaluza-Klein Space-Time	52
4.1	Introduction	52
4.2	The metric and Field Equations	53
4.3	Case-I: Non-interacting Two Fluid Model	54
4.4	Case-II: Interacting Two Fluid Model	56
4.5	Physical Interpretation of the Solutions:	58
5	Five Dimensional Kaluza-Klein Cosmological Model with Variable G and Λ in Conharmonically Flat Space	62
5.1	Introduction	62
5.2	Metric and Field Equations	64
5.3	Solution of the Field Equations	66
5.4	Physical Parameters of the Model and its Behaviour	68
5.4.1	Matter Dominated Solution (Cosmology for $\omega = 0$)	69
5.4.2	Zeldovich Fluid Distribution (Cosmology for $\omega = 1$)	70
5.4.3	Radiating Dominated Solution (Cosmology for $\omega = \frac{1}{3}$)	70
6	Conharmonically Flat Space with Dynamical Cosmological Term Λ in Five Dimensional Kaluza-Klein Space-Time	75
6.1	Introduction	75
6.2	The Metric and Field Equations:	76
6.3	Solution of the Field Equations	78
6.4	Physical Parameters of the Model and its Behaviour	78
6.4.1	Matter Dominated Solution (Cosmology for $\omega = 0$)	79
6.4.2	Zeldovich Fluid Distribution (Cosmology for $\omega = 1$)	80
6.4.3	Radiation Dominated Solution (Cosmology for $\omega = \frac{1}{3}$)	81
7	Five Dimensional Kaluza-Klein Cosmological Model in Conharmonically Flat Space with Hybrid Expansion Law	85
7.1	Introduction:	85
7.2	The Metric and Field Equations	86

7.3	Solutions of the Field Equations	88
7.4	Physical Interpretation of the Solutions:	89
8	Conclusion and Scope for Future Research	93
	Bibliography	97
	Annexure 1	113
	Annexure 2	114
	Appendix	115
