### CHAPTER 1: INTRODUCTION

|                                                           |     |
|-----------------------------------------------------------|-----|
| 1.1. General Account                                      | 1   |
| 1.2. Taxonomy of the genus                                | 2-3 |
| 1.3. Ethnobotany of the genus                             | 3   |
| 1.4. Phytochemical Study                                  | 3   |
| 1.4.1. Importance of Gas Chromatography-Mass Spectrometry | 3-4 |
| 1.4.2. Antioxidant activity and their significance        | 4   |
| 1.4.3. Role of phytoconstituents in antioxidant activity  | 4-5 |
| 1.4.4. Mineral elements and their significance            | 5-6 |
| 1.5. Choices of the work                                  | 6-7 |
| 1.6. Aim and Objectives                                   | 7   |

### CHAPTER 2: REVIEW OF LITERATURE

|                                 |       |
|---------------------------------|-------|
| 2.1. International scenario     | 8     |
| 2.1.1. Review of Taxonomy       | 8     |
| 2.1.2. Review of Phytochemistry | 8-10  |
| 2.2. National scenario          | 10    |
| 2.2.1. Review of Taxonomy       | 10-11 |

|                                                                  |       |
|------------------------------------------------------------------|-------|
| 2.2.2. Review of Phytochemistry                                  | 11-12 |
| 2.3. Review of Ethnobotany                                       | 12-13 |
| <b>CHAPTER 3: Materials and Methods</b>                          |       |
| 3.1. Study Area                                                  | 14    |
| 3.1.1. Map of the study area                                     | 15    |
| 3.2. Field survey                                                | 15    |
| 3.3. Collection of specimens                                     | 15-16 |
| 3.3.1. Plant data collection format                              | 16    |
| 3.4. Herbarium preparation and deposition of specimen            | 17    |
| 3.5. Identification of specimens                                 | 17    |
| 3.6. Nomenclature                                                | 17    |
| 3.7. Herbarium consultation and study of type specimen           | 17    |
| 3.8. Foliar epidermal study                                      | 18    |
| 3.8.1. Light Microscopy (LM) study                               | 18    |
| 3.8.2. Field Emission Scanning Electron Microscopy (FESEM) study | 19    |
| 3.9.1. Quantitative Analysis                                     | 19    |
| 3.10. Petiole anatomical study                                   | 19    |
| 3.11. Leaf architecture study                                    | 20    |
| 3.12. Taxonomic keys                                             | 20    |
| 3.13. Illustrations, Maps, and Photo plates                      | 20    |
| 3.14. Chart, Graph, and Statistical Analysis                     | 20-21 |
| 3.15. Phytochemical Study                                        |       |
| 3.15.1. Qualitative phytochemical analysis                       |       |
| 3.15.2. Preparation of extracts                                  | 21    |
| 3.15.3. Phytochemical screening                                  | 21-23 |

|                                                                             |       |
|-----------------------------------------------------------------------------|-------|
| 3.15.4. Quantitative estimation of phytochemical constituents               | 23-25 |
| 3.16. In vitro Antioxidant activity                                         |       |
| 3.16.1. 2,2-diphenyl-1-picryl-hydrazyl (DPPH) free radical scavenging assay | 25    |
| 3.16.2. 2,2-azinobis-3-ethylbenzothiazoline-6-sulfonic acid (ABTS) assay    | 25-26 |
| 3.17. GC-MS Analysis                                                        | 26    |
| 3.18. Assessment of mineral contents                                        | 26-27 |
| 3.19. Statistical Analysis                                                  | 27    |

#### **CHAPTER 4: RESULTS**

|                                                         |         |
|---------------------------------------------------------|---------|
| 4.1. Enlistment of the genus <i>Glochidion</i> in Assam | 28-29   |
| 4.2. Taxonomic enumeration                              | 29-68   |
| 4.2.1. Key to the species                               | 30      |
| 4.3. Foliar epidermal study                             | 69-85   |
| 4.3.1. Key to the species and varieties                 | 69-70   |
| 4.4. Petiole anatomical study                           | 86-100  |
| 4.4.1. Key to the species and varieties                 | 86-87   |
| 4.5. Leaf architecture study                            | 101-117 |
| 4.5.1. Key to the species and varieties                 | 101     |
| 4.6. Ethnobotanical Study                               | 118     |
| 4.7. Phytochemical Study                                |         |
| 4.7.1. Phytochemical screening                          | 119-122 |
| 4.7.2. Quantitative phytochemical estimation            | 122-125 |
| 4.8. In vitro antioxidant activity                      |         |

|                                           |         |
|-------------------------------------------|---------|
| 4.8.1. DPPH free radical scavenging assay | 126-127 |
| 4.8.2. ABTS assay                         | 128-129 |
| 4.9. GC-MS Analysis                       | 130-137 |
| 4.10. Assessment of mineral contents      | 138-139 |

## CHAPTER 5: DISCUSSION

|                                                               |         |
|---------------------------------------------------------------|---------|
| 5.1. Significant findings of the study                        |         |
| 5.1.1. Critical notes on the genus <i>Glochidion</i> in Assam | 140-142 |
| 5.1.2. New distribution record                                | 142     |
| 5.1.3. Morphology of the genus                                | 142-144 |
| 5.1.4. Taxonomic significance of anatomical characters        |         |
| 5.1.4.1. Foliar epidermal study                               | 144-153 |
| 5.1.4.2. Petiole anatomy                                      | 153-154 |
| 5.1.4.3. Leaf architecture study                              | 155-156 |
| 5.1.5. Significance in Phytochemical Study                    |         |
| 5.1.5.1. Phytochemical screening                              | 157     |
| 5.1.5.2. Quantitative estimation                              | 157-160 |
| 5.1.6. Antioxidant activity                                   | 161-162 |
| 5.1.7. GC-MS Analysis                                         | 162-173 |
| 5.1.8. Assessment of mineral elements                         | 173-175 |
| 5.2. Significant test for quantitative analysis               |         |
| 5.2.1. Foliar epidermal study                                 | 175-176 |
| 5.2.2. Phytochemical study                                    | 176-177 |
| 5.2.3. Antioxidant activity                                   | 177-178 |
| 5.2.4. Estimation of mineral elements                         | 179     |

|                           |         |
