

CONTENTS

Title	Page No.
Certificate	i
Declaration	ii
Acknowledgment	iii-iv
Chapter 1 Introduction	1-7
Chapter 2 Review of Literature	8-22
2.1. Protein and its importance in aquaculture nutrition	8-9
2.2. Macrophytes as alternative protein sources in fish diets	9-12
2.3. <i>Lemna minor</i> as alternative plant protein source	12-13
2.4. <i>Ipomoea aquatica</i> as alternative plant protein source	14-15
2.5. Effect of different plant protein sources on <i>Anabas testudineus</i> and <i>Heteropneustes fossilis</i>	15-22
Chapter 3 Materials and Methods	23-47
3.1. Collection of <i>Lemna minor</i> and <i>Ipomoea aquatica</i>	23-24
3.2. Experimental fish species	24-25
3.3. Fish culture unit and experimental design	26-27
3.4. Proximate composition analysis	27
3.5. Antinutritional factors	28-29
3.6. Amino acid analysis	30
3.7. Fatty acid analysis	30-31
3.8. Experimental feed formulation	31-33
3.9. Feeding trial and sampling	33-34
3.10 Growth performance	34-36
3.11. Digestive enzyme activity	36-40
3.12. Biochemical parameters	40-44
3.13. Statistical analysis	44
Chapter 4 Results	47-135
4.1. Nutritional characteristics of the two freshwater macrophytes, <i>Lemna minor</i> and <i>Ipomoea aquatica</i>	47-51

4.2. Effect of <i>Lemna minor</i> supplemented feeds on the growth performance, digestive enzymes and biochemical parameters of <i>Anabas testudineus</i>	52-73
4.3. Effect of <i>Lemna minor</i> supplemented feeds on the growth performance, digestive enzymes and biochemical parameters of <i>Heteropneustes fossilis</i> .	74-94
4.4. Evaluating the growth, digestive physiology and biochemical parameters of <i>Anabas testudineus</i> fed with <i>Ipomoea aquatica</i> supplemented diets	95-115
4.5. Evaluating the growth, digestive physiology and biochemical parameters of <i>Heteropneustes fossilis</i> fed with <i>Ipomoea aquatica</i> supplemented diets	116-134
Chapter 5 Discussion	135-160
Chapter 6 Summary and Conclusion	161-166
References	167-193
Publications & Conferences	194-219
