Declaration and Certificates	i-iii
Acknowledgement	iv-v
Abstract	vi-ix
Table of contents	x-xiii
List of figures	xiv-xxii
List of tables	xxiii
Abbreviations and symbols used	xxiv-xxvii
<b>Chapters</b>	
<b>1. Introduction</b>	<b>1</b>
1.1. Present scenario of water pollution	1
1.2. Wastewater treatment	3
1.3. Photocatalysis	5
1.3.1. Doping and defects	11
1.3.2. Heterojunction and surface engineering	16
1.3.3. Local surface plasmon resonance and plasmonic photocatalysis	20
1.4. Potential materials for photocatalysis	28
1.4.1. Plasmonic materials	28
1.4.2. Semiconductor materials	29
1.5. Objectives and summary of thesis	33
References	34
<b>2. Experimental approaches and techniques</b>	<b>48</b>
2.1. Pre-synthesis protocols and setups	48
2.1.1. Preparation of doubly distilled water	48
2.1.2. Glassware handling protocols	48
2.2. Synthesis procedures	49
2.2.1. Sol-gel method	49
2.2.2. Modified sol-gel method	49
2.2.3. Co-precipitation method	50
2.2.4. Reduction method	51

2.3. Post synthesis methods	52
2.3.1. Centrifugation	52
2.3.2. Calcination	52
2.3.3. Grinding	52
2.3.4. Drying	53
2.3.5. Ultrasonication	53
2.4. Characterization	54
2.4.1. X-ray diffraction	54
2.4.2. Raman spectroscopy	56
2.4.3. Scanning electron microscopy	56
2.4.4. Transmission electron microscopy	56
2.4.5. Photoluminescence and time-resolved photoluminescence	59
2.4.6. UV-visible-diffuse Reflectance Spectrometer	60
2.4.7. UV-vis Spectrometer	61
2.4.8. X-ray photoelectron spectroscopy	62
2.4.9. Electron spin resonance spectrometer	62
2.4.10. Electrochemical experiment	62
2.5. Kinetics study	63
2.5.1. Photocatalytic degradation kinetics	63
<b>3. Band-gap engineered multi-junction photocatalyst for enhanced visible-light-driven degradation of organic pollutants</b>	<b>65</b>
3.1. Introduction	65
3.2. Experimental details	67
3.2.1. Materials and methods	67
3.2.2. Characterization	68
3.3. Results and discussion	68
3.3.1. XRD analysis	68
3.3.2. UV-vis-DRS analysis	71
3.3.3. SEM and TEM analysis	74
3.3.4. ESR analysis	76
3.3.5. Photoluminescence spectra analysis	76
3.3.6. XPS analysis	79

3.3.7. Kinetic study for degradation of MB	83
3.3.8. Photocatalytic mechanism and schematic representation	87
3.4. Summary	88
References	88
<b>4. Strategically developed plasmonic-activated heterojunction system for high-efficiency visible-light-driven photocatalysis</b>	<b>94</b>
4.1. Introduction	94
4.2. Experimental details	96
4.2.1. Materials and methods	96
4.2.2. Characterization	98
4.3. Results and discussion	98
4.3.1. XRD and UV-vis-DRS analysis	98
4.3.2. Raman, ESR and photoluminescence analysis	102
4.3.3. XPS analysis	105
4.3.4. FE-SEM and TEM analysis	112
4.3.5. Photocatalytic degradation kinetics	114
4.3.6. Active radical quenching experiments	119
4.3.7. Photocatalytic mechanism and schematic representation	121
4.4. Summary	122
References	123
<b>5. Surface plasmon resonance enhanced Z-scheme photocatalysis using Ag integrated heterojunction of an emerging semiconductor</b>	<b>130</b>
5.1. Introduction	130
5.2. Experimental details	132
5.2.1. Materials and methods	132
5.2.2. Characterization	135
5.3. Results and discussion	135
5.3.1. Structural and optical characterization	135
5.3.2. Study of Raman and photoluminescence spectra	140
5.3.3. XPS analysis	142
5.3.4. SEM and TEM analysis	144
5.3.5. Photocatalytic activity test	148

5.3.6. Scavenger-based radical identification experiments	156
5.3.7. Mott-Schottky analysis	157
5.3.8. Photocatalytic mechanism	157
5.4. Summary	163
References	164
<b>6. Influence of plasmonic nanostructure geometry on a host semiconductor and optimization of key parameters for enhanced photocatalytic efficiency</b>	<b>173</b>
6.1. Introduction	173
6.2. Experimental section	175
6.2.1. Material and methods	175
6.2.2. Characterization	176
6.3. Results and discussion	177
6.3.1. Photocatalytic performance optimization coupled with XRD Study	177
6.3.2. UV-Visible absorbance and DRS characterization	187
6.3.3. Structural and morphological analysis	190
6.3.4. Raman and photoluminescence analysis	199
6.3.5. XPS analysis	201
6.4. Summary	202
References	204
<b>7. Conclusion and future scope</b>	<b>207</b>
<b>Appendix I:</b> Journal publications and book chapter details	
<b>Appendix II:</b> Conferences and workshops
