

List of Figures

Figure	Page no
Figure 3.1: Study area;	16
Figure 4.1A: Microscopic Plate; <i>Volvariella volvacea</i>	32
Figure 4.1B: Drawing <i>Volvariella volvacea</i>	33
Figure 4.2A: Microscopic Plate; <i>Termitomyces heimii</i>	34
Figure 4.2B: Drawing <i>Termitomyces heimii</i>	35
Figure 4.3A: Microscopic Plate; <i>Lentinus sajor-caju</i>	36
Figure 4.3B: Drawing <i>Lentinus sajor-caju</i>	37
Figure 4.4A: Microscopic Plate; <i>Chlorophyllum hortense</i>	38
Figure 4.4B: Drawing <i>Chlorophyllum hortense</i>	39
Figure 4.5A: Microscopic Plate; <i>Cantharellus subamethysteus</i>	40
Figure 4.5B: Drawing <i>Cantharellus subamethysteus</i>	41
Figure 4.6: Genomic DNA & PCR product	42
Figure 4.7: Chromatogram for amino acid	45
Figure 4.8: <i>V. volvacea</i> Chromatogram for fatty acid and Bioactive compounds.	49
Figure 4.9: <i>T. heimii</i> Chromatogram for fatty acid and Bioactive compounds.	49
Figure 4.10: <i>L. sajor-caju</i> Chromatogram for fatty acid and Bioactive compounds.	49
Figure 4.11: <i>C. hortense</i> Chromatogram for fatty acid and Bioactive compounds.	50
Figure 4.12: <i>C. subamethysteus</i> Chromatogram for fatty acid and Bioactive compounds.	50
Figure 4.13: Gallic acid standard for phenolic content	53
Figure 4.14: Phenolic content	53
Figure 4.15: Quercetin standard for flavonoid content	54
Figure 4.16: Flavonoid content	54
Figure 4.17: FeSO ₄ standard for FRAP	55
Figure 4.18: FRAP value	55
Figure 4.19: Ascorbic acid standard for DPPH	56
Figure 4.20: Ascorbic acid standard for Superoxide scavenging activity	57
Figure 4.21: Ascorbic acid standard for Nitric oxide scavenging activity	57
Figure 4.22: <i>E. coli</i> . Antimicrobial assay	63
Figure 4.23: <i>B. cereus</i> . Antimicrobial assay	64
Figure 4.24: <i>P. vulgaris</i> . Antimicrobial assay	65
Figure 4.25: <i>K. pneumoniae</i> . Antimicrobial assay	66

Figure 4.26: <i>S. aureus</i> . Antimicrobial assay	67
Figure 4.27: 2D & 3D ligand interaction: Isoleucyl-tRNA synthetase	77
Figure 4.28: 2D & 3D ligand interaction: Dihydropteroate synthase	77
Figure 4.29: 2D & 3D ligand interaction: D-Alanine-D-Alanine Ligase	77
Figure 4.30: 2D & 3D ligand interaction: Topoisomerase ATPase inhibitor	77
Figure 4.31: 2D & 3D ligand interaction: Penicillin Binding Protein	78
Figure 4.32: 2D & 3D ligand interaction Bacterial Efflux Pump	78
Figure 4.33: Isoleucyl tRNA synthetase: G score, Docking score, State penalty & ΔG	87
Figure 4.34: Dihydropteroate synthase: G score, Docking score, State penalty & ΔG	87
Figure 4.35: D-Ala:D-Ala ligase G score, Docking score, State penalty & ΔG	88
Figure 4.36: Topoisomerase ATPase inhibitor; G score, Docking score, State penalty & ΔG	88
Figure 4.37: Penicillin Binding protein; G score, Docking score, State penalty & ΔG	89
Figure 4.38: Bacterial efflux pump: G score, Docking score, State penalty & ΔG	89
